### PROJECT"S

#### Online Mutton Selling Platform / web page

HTML, Tailwind CSS, JavaScript, PHP, MySQL, XAMPP

Built a complete e-commerce platform for a local shop enabling online ordering, real-time location tracking, and WhatsApp integration. Implemented order scheduling, invoice generation, and admin access for stock and order management.

#### Anonymous Complaint System / web page

HTML, CSS, JavaScript, PHP, MySQL, Firebase, XAMPP

Created a secure complaint platform for users to submit and track complaints anonymously using unique IDs. Added a real-time chat feature via Firebase and an admin panel for complaint analytics and resolution.

#### Chatbot for Websites (Offline) /team project

HTML, Tailwind CSS, JavaScript, JSON

Designed a chatbot to help users get website information instantly, even without an internet connection.

#### AutoBot — Agentic AI/ (In Progress)

Python, Streamlit, Selenium, Firebase, Google APIs

Developing an AI-driven automation tool that scrapes job data, tailors resumes, and generates HR outreach emails automatically.

#### StudyScribe - hybrid academic service platform /(In Progress)

HTML, Tailwind CSS, JavaScript, Firebase

Building a platform to connect students and academic writers with role-based access (User/Writer/Admin). Integrated Firestore for real-time data management and responsive UI for assignment collaboration.

### EDUCATION

2024–2026

K J Somaiya Institute of Management, Mumbai

MASTER OF COMPUTER APPLICATIONS (MCA), ENGINEERING

### SKILLS

**Cloud & DevOps:** AWS, Docker, Linux, CI/CD, GitHub Actions,  
**Cloud Computing Languages:** Java, JavaScript, PHP  
**Web Development:** HTML, Tailwind CSS, CSS3, XAMPP, Firebase  
**Database:** MySQL, Firebase Firestore  
**Basic Networking, Responsive Web Design**

### TOOLS

Git · Figma · Power BI · VS Code · xamp
